

Duplessis Takes Firm Stand On Federal Grants To Universities

PRESIDENT'S STATEMENT

The following is a statement made by Roy Heenan, President of the S.E.C. on the text of Premier Duplessis' speech, a report of which appears on this page.

It is a great pity that the premier has again chosen to make the matter of Federal grants a political issue.

The need for higher education is too important for it to become subject to the hazards of politics. Mr. Duplessis' intransigence concerning federal grants is most distressing in view of the plight of the Universities in this Province. For political reasons, the Quebec universities are being deprived of desperately needed aid, and as a consequence both they and their students must suffer.

THE B.N.A. ACT

Mr. Duplessis has stated that the policy of federal subsidies to provinces is anti-liberal, anti-parliamentary, anti-constitutional and against simple logic. Exactly what this is supposed to mean is difficult to know. If this refers to his claim that federal grants to universities are unconstitutional because education is, by the B.N.A. act, within the jurisdiction of the provinces, how does he justify his own \$50,000 gift in recent years to the University of Ottawa?

If the Premier believes that only a province can finance its own universities, surely he, representing Quebec, was acting unconstitutionally when giving money to an Ontario university. The (Continued on page 3)

What, You Mean You Didn't Vote?

by Cathy Curry

42.4% of the campus voted in yesterday's elections. This was an increase over last year's 38.8%. Matt Welchner, chief returning officer of the election, stated: "After receiving six acclamations for SEC posts, I was very surprised at the record turnout of voters".

SEC

Sandra Zelnicker and Peter White were elected to represent Arts and Science on the SEC, while Duncan Robertson was chosen from Commerce. Ted Higgins and John Roland will re-

present the faculty of Engineering.

The following were chosen by acclamation:

Law will be represented by W. C. McCallum and Medicine, by Daniel Cowan.

Architecture elected Dick Tobin. The faculties of Music and Divinity chose Mark Conliffe.

The schools of Physical Education, Physiotherapy and Graduate Nurses elected as their joint representative, Dawn Marshall.

Students in the faculty of Dentistry elected Mark Hatt.

WOMEN'S UNION

The new vice-president of the Women's Union is Barbara Ray-side. She defeated Janet Hyndman and Jean McMichael.

Gael Eakin and Eleanor Webster were chosen non-resident members-at-large.

The W.A.A. representative for the coming year will be Nancy Grant.

RED WING SOCIETY

Nine girls were elected to the Red Wing Society: Judy Davis, from Physiotherapy, Gael Eakin, Anne LaFleur, Elaine Nadler, from second year. From third year, Nora Altimas, Margaret Clegg, Cécile Kalifon, June Steinberg, and Hiroko Watanabe, were chosen from third year.

SCARLET KEY SOCIETY

Arts and Science: Ross Adair, Michael Meighen, Daniel Tingley, (Continued on page 3)

Loans Not Grants Will Be Discussed

"As long as I am premier of the Province", stated Mr. Duplessis when speaking in the Throne Speech Debate, "we will never use the Canadian Constitution as an auction block on which to sell the rights of the Province."

Duplessis told the Legislative Assembly he would "never approve the idea of federal grants to universities regardless of what party happens to be in power at Ottawa."

The Premier says the policy of the federal subsidies to provinces is anti-liberal, anti-parliamentary, anti-constitutional and against simple logic.

The premier, during the Throne Speech debate said that Quebec's stand on provincial rights had not varied with the political colour of the party in power in Ottawa. And this stand would not vary in the future, he added.

"When we, of the National Union, look upon Ottawa, we do not see there a Liberal or Conservative regime, but a Canadian regime," he said. "Quebec's position and attitude regarding the Federal Government has not changed and will not change."

QUEBEC NOT CONSULTED

Referring to the Diefenbaker government's decision to boost Federal grants to the Universities, Mr. Duplessis said that the Prime Minister had not consulted Quebec in this connection.

"But we shall not consult him either about our course of action," the Premier added.

"I told the students I would discuss the question of providing financial help to students," said the premier, "I did not tell them we would discuss the question of grants to Universities."

"That is a matter for the Government to decide."

He said that he had decided December 2 to meet the presidents of the student associations of Quebec's six universities to discuss a government legislation project to increase aid to students with insufficient financial means.

PREMIER DUPLESSIS

He added that only the presidents of the student associations were invited and that only the matter of aid to needy students would be discussed.

"By putting demagoguery aside and looking at the situation squarely in the face, it is easy to see that there are many other classes of students besides university students," he said.

The farmers have a right to schools for their children and the workers are also entitled to schools for their sons who might want technical or specialized training.

"Never will I sacrifice the urgent needs of our elementary education for university education," he stated.

Ex-mayor Drapeau To Speak At McGill

For the first time since his defeat in the mayoralty elections of October, 1957, Jean Drapeau, former Montreal mayor, will speak to McGill students at 1 pm. today in the Union Ballroom in a general question and answer period.

Mr. Drapeau is honorary president of the Civic Action League, which last summer, after a meeting of 47 "eminent citizens" stated that it was studying the feasibility of entering provincial politics.

It was with this objective in mind that the C.A.L. has formed political cells in 56 of the 93 provincial ridings, and Mr. Drapeau would be the logical choice for the leadership of such a new grouping.

Recently there has been much talk of a Union of Democratic Forces against the National Union at the next Quebec Provincial elections. Mr. Drapeau has strongly denied press reports stating that the C.A.L. looked favorably on such a coalition. It is expected that this will be among the topics to be discussed to-day.

MR JEAN DRAPEAU

On College Athletics

The noted American educator Harold W. Stoke discusses, in an article, the touchy question of college athletics under the title: *Education or Show Business?* In a novel and stimulating manner the author examines the conflict between big-time sport, with its exorbitant demands and widespread popularity, and the university where it has a found a happy home and whose aims and principles it threatens to undermine; the conclusion reached are both startling and revolutionary.

Professor Stoke points out that there is no longer any educational value in college athletics: their highly competitive nature that precludes propagation of 'sportsmanship' and the building of 'character'; their high standard demands over 20 hours of practice per week in addition to time spent travelling (McGill basketball players have to miss six whole days of classes in two months); their increasing importance puts men whose interest is not primarily in education in positions where they help in its direction.

Indeed there is a fundamental distinction between the institution's interest in the student and its interest in the athlete. While universities attract students in order to give them skill and knowledge not yet acquired, large American schools look for athletes when they are already proficient; whereas the student comes to university for the services it can render him, the athlete is recruited for what he can do for the university.

More and more the financial aspects of sport determine the policies and practices of many educational institutions. The entire athletics set up is geared to provide entertainment for the public and the graduates. Schedules, stadia, coaching specialists, colorful bands, etc., are manifestations of this drive, financially motivated, to provide top-calibre entertainment. And, of course, a winning team is absolutely necessary for this purpose.

If this is so, the article concludes, and there are in fact two major functions of a university, why not completely separate them and do honestly what is being done surreptitiously in any case. If it is admitted that athletic programs are operated primarily as public entertainment and not educational responsibility, then the course to pursue is clear: establish a legitimate university department with the sole purpose of producing championship football teams, much as the history department exists solely for the teaching of history. Professor Stoke suggests unlimited athletic subsidizations, the abolition of academic requirements for athletes (though these may many pursue whatever courses they wish to on a voluntary basis).

There are two possible ways out of this schizophrenic muddle of ideals and actual practices. One is the professionalism advocated by Professor Stoke. The other, of course, is a general de-emphasis of college athletics.

An educational institution must not allow the possibility of large sports revenues or the happy glow in the hearts of graduates to outweigh the principles and laws it stands by. Nor, we feel should a university be prepared to supply entertainment to the public. If the only alternative is general de-emphasis of athletics, then this should be by all means be undertaken.

Letters To The Daily

An Argument For Federal Grants

To the Editor:

In his letter to the Daily of November 24, Mr. MacGregor Suzuki writes against federal grants to the universities. His arguments do not seem to be directed specifically at federal support as opposed to provincial grants, but at statutory subsidies per se.

Mr. Suzuki stresses the fact that government support entails government influence or control, and refers to such examples as the fixing of academic standards and curricula. It seems to me that this particular feature of government interference is not necessarily objectionable: the standing and achievements of French and German scientists over the last hundred years leave little to be desired.

The core of the problem raised is the relationship between private and state contributions and their bearing on the quality of higher education and freedom of thought in the universities. This calls for a thorough examination of the nature and adequacy of private support, which must come mainly from commercial enterprise, contributions by individual ex-alumni and the like being small and liable to disappear in times of economic difficulty. Let us state first that the following remarks are not aimed at any particular school, corporation or private person; they are applicable in all cases.

Strings may be attached to large private contributions as well as to state aid, but there also is another aspect to the problem. The very nature of commercial corporations restricts the scope of their support. They are created to produce returns, not to engage in unproductive speculations. An individual with a special interest in social or scientific matters, here and there in the organisation, does not change the general trend, except perhaps in a few family concerns. Hence it cannot be a matter for surprise that throughout the world contributions from trade and industry result in the first place in new facilities, scholarships, prizes and other encouragements for schools of commerce and engineering, practical and well-advertised institutions which until the turn of the century were outside the university.

Yet the traditional faculties still are, even from a pragmatic point of view, as important as they were in the past. Remove the arts courses, and an illiterate nation will lull itself into oblivion. The utility of physician or bacteriologist needs no illustration. Lawyers help to prevent or solve conflicts in business, national and international life inherent to human society. Sociologists, psychologists and theologians fight the causes of delinquency, that costly disease of the social body, and try to guide our society in the search for new values fitting the dimensions of an emergent tomorrow. The eccentric biologist whose single interest is one little grasshopper may save millions from starvation. It may be said that many of the most important discoveries and creations in human history are due to seemingly insignificant men engaged in pursuits of no apparent utility. But such men are last in line to receive the attention of private business supporting education, and when times are difficult and profits low they risk to be scrapped from the rolls altogether.

And who are these men? Po-

tentially, each one of our professors, researchers, co-students. Considering their responsibility towards society, their salaries and bursaries are ridiculously low; a looming depression might remove them from the campus right away. The only adequate source of support willing to disregard economic conjuncture or immediately visible utility is the government, because, through its daily contact with the balance of needs and means in the State, it alone is able to recognise the minimum requirements of education in all its compartments. True, the wisdom of ministers is limited and their hunger for power may be great. But the last two centuries have shown a peculiar process in countries with State-financed universities.

It is characteristic of the true scientific spirit that in the long run it probes, analyses and if necessary condemns even the

Prof. Catlin Debates

Quemoy and Matsu
Worthless Islands

by Bernard Schneider

Quemoy and Matsu are of no importance in themselves, rather they are symbolic pieces of real estate having no material value, Professor George Catlin said in the debate "The Defense of Quemoy and Matsu is vital to the Containment of Communism."

Professor Catlin, reminiscent of yesterday's humorous panel discussion said that the Quemoy question is too vital to be joked about. He asserted that Formosa is definitely part of the mainland of China even though the British foreign office does not recognize this fact.

The Professor attacked the question in relation to the present situation. He said that we can not overlook the 400,000,000 population of China. Although "if we are to recognize the de facto government of China, we would also be compelled to give recognition to East Germany."

Professor Catlin, though a Socialist, was still able to assert that Nye Bevin had made mistakes in his Palestine policy and in his erroneous recognition of Peking.

WEAK ATTITUDE

He asserted that there are too many people who would rather kill their own mothers than get involved in a dispute with Russia. Such an attitude is harmful to the Western world and is very weak. "The British dealt successfully with the Germans in the 1940's, disproving the opinion that they couldn't be beaten, and shaming those who were for appeasement."

However, the British and the anti-German world should have undertaken to curb German designs in 1936 rather than in 1939.

We of today should handle the Russians in the same way as the Germans were handled. Unfortunately, many of us lack the courage to do so. This is due in great part to our inherent democratic weaknesses. The Americans are smothered by the desire to have life comfortable. Unfortunately, history has shown that comfortable civilizations have been overthrown by simpler and more ruthless peoples.

MacArthur was right — and it is also right to go to war for West Berlin. Professor Catlin, in closing, stated that Formosa is important, and the defense of Matsu and Quemoy is also an important bastion in the containment of Communism. The Western world must pursue a firm line, not a line of withdrawal to buy boats.

TYPIST AVAILABLE for term papers, theses etc. Call Bryna Levine CH. 6-6724.

John McLeod, the speaker for the negative, began with "I find it difficult to talk against Professor Catlin because I intend to talk about the motion."

POLICY ONLY IDEALISTIC

Formosa is a part of China. Generalissimo Chiang Kai Chek knows this and was determined to reconquer the mainland, yet the hope of conquest has faded into the past, so McLeod believes. He said that the Western policy of upholding Quemoy and Matsu is an idealistic but not realistic attempt to hem in the reds.

Heenan's Statement

truth is that there is vast difference between legislating with respect to education and making unrestricted gifts. All Canadian universities at one time or another have received such aid without the constitutionality being questioned. One can only conclude that his objections are not legal so much as political.

We as students can only regret that our own university, as well as higher education in this Province as a whole, is suffering as the result of political stubbornness.

Employment Interviews

Interview schedules for graduating students in Engineering and Science will be drawn up early in December.

Polo Squad Ties "Y" 11-11

The McGill water polo team drew a draw against the Central YMCA in a see-saw game that could have gone either way up until the final whistle.

Henry Polkki and team captain Pentti Luomalo shared high scoring honors with four a piece. Cameron Grout got two, and Ery Magasanik, who turned in a fine performance, picked up the remaining tally.

On the other side of the fence, former McGillian; 'Topper' Toporowski scored a hat trick and team-mate John Pare followed suite. Steve Bobula was good for two and Milo Klacko, a recent import, went for the same amount. Harry Oljemark got the eleventh of the team's markers.

The YMCA scored twice in the first period before the Redmen got on the scoreboard, but Grout and

by Mel Sher

Luomalo scored to even it out at the end of the first.

In the second, it was McGill all the way as they outscored the 'Y' 5-2 to leave a 7-4 total in favour of the Redmen. The 'Y' caught up in the third as they scored five goals to McGill's three, and equalised the score in the last quarter leaving a final tally of 11-11.

'Swiss' Svisteneko played a fine game in the nets, while Leon Jacobovits and Allen Halmay aided in the defense chores. Pressing hard on the forward line were Ed Menashe and Pete Halmay and Belinsky.

FINAL SATURDAY

On Sat. night, the water polo squad will meet the Toronto Blues in the final tilt of the inter-col-

legiates. The Varsity squad takes to the waters with a one point lead in virtue of their 7-6 victory over the Redmen in Toronto. The second game of the two game series will see the Redmen with some advantage due to the fact that they are playing in their home pool.

McGill has held the title for the past three years, and the team that will be defending it this year is almost all new. The only veteran from last year's team is Leon Jacobovits. But team captain Pentti Luomalo should be good for a few markers as should also Henry Polkki. Adding speed to the team will be swimming ace Cameron Grout and Egyptian import Ed Menashe will provide some drive for the forward line.

The brothers Halmays, Pete and Allen help fill out the ranks, and Ery Magasanik and Belinsky fill

out the McGill side of the programme. In the nets will be Juris 'Swiss' Svisteneko who has guard-

ed the nets with great effectiveness throughout the season. Game time Saturday is 8:30 pm.

Hockey Redmen Bow 4-2

A desperate third period drive by the McGill Redmen fell short tonight as the N.D.G. Maple Leafs of the Metropolitan Hockey League won a close 4-2 decision.

N.D.G. dominated play in the initial two stanzas, and after a scoreless first period, rammed in three unanswered tallies in the second to grab the lead. However a pair of goals by Joe Irvin early in the final canto slashed the margin and set the stage for a wide-open, fast third period, which became very rough and bruising at times with players on both sides really handing out the weight. In all, 10 penalties were handed out, five to each team, none of which figured directly in the scoring.

NDG TAKES LEAD

After a close checking first period, in which both teams had very few scoring opportunities, N.D.G. broke ice at 1:40 of the middle frame with Jones beating McGill netminder Alex Heron on a close-in shot, on a pass from Delisle. The Maple Leafs then ran the count to 3-0 with two quick goals late in the stanza, as the McGill defence fell apart. Christiano got the first of the two at 15:25 on passes from Delisle and Whitehouse. Boudreissais netted the second 51 seconds later with assists going to Christiano and Delisle. The Redmen had several scor-

ing opportunities in the period with Irvin and Saunders, especially, being stopped when close in.

However, the McGill squad came up with its finest period of hockey of the young season in the third when the forwards began to click with their passing and shooting. The line of Joe Irvin, Ivan Saunders and Jimmy Grant applied constant pressure throughout and clicked for two early goals. Irvin converted Saunderson's passout from behind the nets at 1:01 and then again took a goalmouth pass from Saunders to score his second marker at the 5:28 mark. Grant vained assists on both goals. The Redmen followed with a penetrating attack but just couldn't seem to get the equalizer. Finally, with both teams short-handed for high-sticking, the Maple Leafs sewed things up with Delisle picking up his fourth point of the night by beating Heron at 16:01 on a pass from Blake.

Hindu Scholar Here To Speak On Modern Asia

Dr. Amiya Chakravarty, Professor of Comparative Oriental Religions and Literature at Boston University, and advisor to the Indian delegation at the United Nations, will speak on Nov. 28 in the auditorium of the Physical Science Building. A 57-year-old Hindu scholar and former intimate of Indian philosopher and leader Mahatma Gandhi, Dr. Chakravarty arrives in Montreal next week for a series of lectures and seminars on present-day Asia.

On Nov. 27, he will speak first to a seminar in the Queen's Hotel. Dr. Chakravarty will address the seminar on the subject of "Cross-currents in Contemporary Asia". The next day he will lecture on "Creeds and Deeds in the World Religions" in Channing Hall.
